3D PANEL INSTALLATION GUIDE

IMPORTANT

Walls to be installed must have plywood backing.

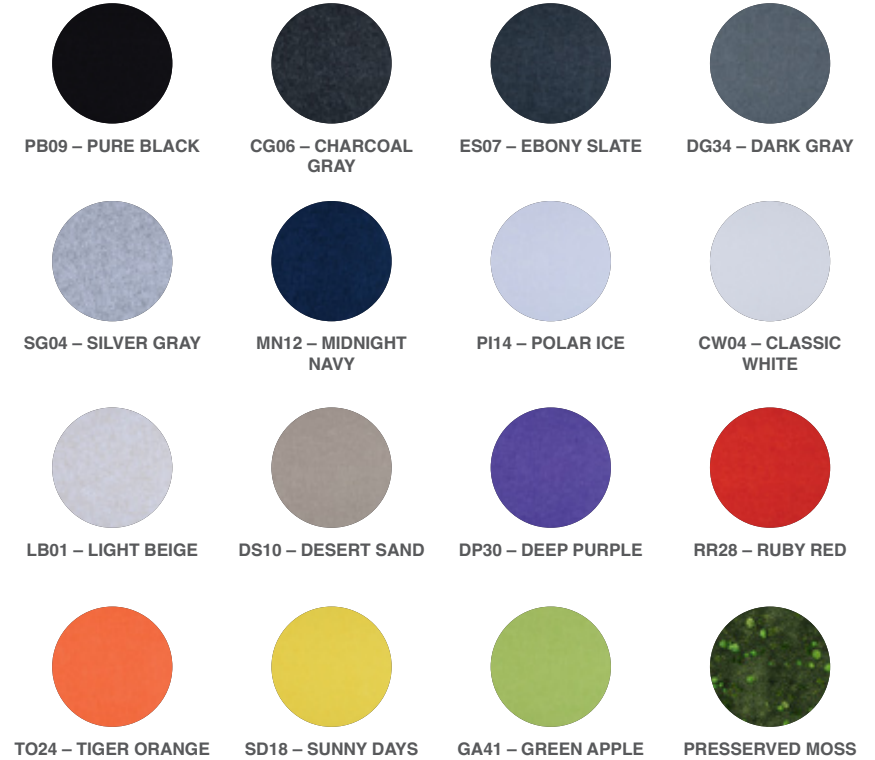

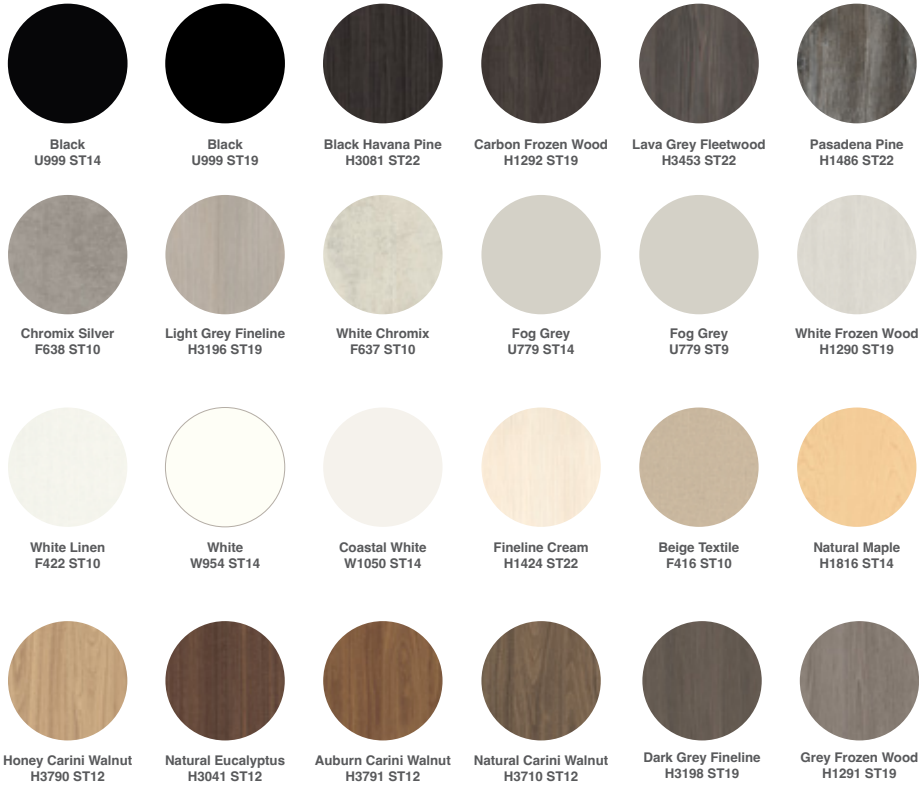

Drywall (1/2" thick max.) must be installed directly over plywood.

INSTALLATION INSTRUCTIONS

- 1.- Place stencils provided, side to side, on the bottom left corner of desired wall.
- 2.- Using a marker, mark all of the hole openings.
- 3.- Remove stencils and place aside.
- 4.- Install "shoulder-screws" on the marks.
Make sure the shoulder-screws are screwed into the plywood backer.
- 5.- Locate the slat to be installed (slats are numbered on its back).
- 6.- Slide the slat downwards inserting the head of the screws into the receiving hardware installed.
- 7.- Once all slats are installed, place the stencil directly onto the side of the last slat and continue with step 2.
- 8.- If wall has multiple sets vertically, each entire level must be installed at a time.

ENDLESS COLOR POSSIBILITIES!
